

# So You Have a Water Leak?

## COMMON HOUSEHOLD LEAKS TO CHECK

### TOILETS

1. Take off tank lid and add 10 drops of food dye into tank.
2. Wait 30 minutes without flushing!
3. If you see color in the bowl you have a leak. Replace flapper.

### FAUCETS, SINKS & SHOWERHEADS

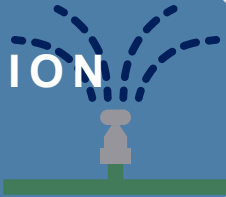

Easy fixes can be as simple as tightening your connections, replacing seals/washers, using plumber's tape, or sealing gaps with caulk.

### APPLIANCES

Replace damaged hoses, tighten any loose fittings, clean out blockages, check seals for any tears or breaks.

### IRRIGATION SYSTEM

Walk your lawn and flower beds and inspect for wet areas and listen for flowing water. If you have found a leak, turn off your double check valve (located in the green box) until repairs can be made.

### USE ACE PORTAL

Check your water usage and set alerts to catch leaks sooner to save water and money! Access ACE Portal through the MyProsper App.

## Let's all do our part and #LetWaterPROSPER
