

Child Car Seat Installation

The Prosper Fire Department has Certified Child Passenger Safety Technicians on staff to help you inspect your car seat and to make sure it is properly installed. If child safety seats are installed incorrectly, a child's chances of being injured in a motor vehicle crash can be greatly increased. There is no charge for this service, but we do ask that you have an appointment.

A typical car seat check should take anywhere from 20-30 minutes. We ask you to bring the vehicle owner's manual, car seat manual, and if possible, the child who will be using the seat. Please also remember that our car seat technicians are Firefighters on duty and have other duties which may include leaving the station to answer emergency calls. There may not be a certified technician on duty at all times. For these reasons, we ask that persons desiring a child safety seat inspection call the station in advance to schedule an appointment.

For more information, or to schedule a child safety seat inspection, please call the Fire Station at (972) 347-2424.

Q: Why must I make an appointment to have my safety seat inspected?

A: The firefighters checking your seat are on duty and may have to leave the station to answer emergency calls during an inspection. Moreover, they may have left the station for an emergency call prior to your arrival. Also, there may not be a technician on duty at the station at all times. Calling ahead allows us to help ensure that someone will be available to provide the inspection.

Q: What are the hours for car seat inspections?

A: Hours for car seat inspections are 8 am - 6 pm, 7 days per week. If you require special arrangements, please call the fire station. We will be happy to work with you.
